(907) 622-6000 TEL, (907) 622-6001 FAX, www.microtelinn.com. eaglerivermicrotel@ak.net

Please see following pages for more details and Registration Form

Classes begin each morning at 8:00 AM. Lunch will be provided.

- **Class #1** stresses the use of **Total Stations** and **Robotics**
Most software functions are similar whether GPS or Optical Total Stations are used.
- **Class #2** is pointed to scanning and imaging functions, field and office, available with Topcon Image Stations.
- **Class #3** concentrates on the use of GPS GNSS with TopSURV and Topcon Tools.
- **Class #4** walkthrough use of SurveyMaster/SiteMaster software.
- **Class #5** goes through an overview and use of Topcon Pocket3D on Data Collectors.

GPS Alaska will provide all GPS and Total Station Equipment needed for the courses.

Continuing Education

- Certificates of Completion will be provided to all who complete the courses.
- It is recommended that those who complete the courses claim 8 hours per day of Professional Development Hours toward Continuing Education requirements for Professional Licenses if needed.

TRAINEES NEED TO PROVIDE:

For ALL Classes:

- **Bring your own Notebooks and pencils.** Laptops are optional. You will be able to update software for laptops and data collectors ***prior to class*** for TopSURV, Topcon Tools and Topcon Pocket3D via Topcon University Website. Bring your own **Data Collector** if you have one. (FC-120, 250, 2500 or 236). *Up to 2 trainees can share a Data Collector if you desire.*
